It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Please replace Claim 10, Col. 9 Line 20-25 with the following:

10. A computer-implemented electronic marketplace, using one or more computer systems at one or more locations, for resolving excess or under capacity at one or more enterprises in a supply chain, comprising:

at least one of the one or more computer systems comprising:

a supply chain planning application, the supply chain planning engine receives status data for a plurality of enterprises in the supply chain, the status data reflecting excess or under capacity at a first enterprise in the supply chain, accesses a supply chain model incorporating at least the plurality of enterprises in the supply chain, and generates a supply chain plan according to the status data for at least the plurality of enterprises in the supply chain; and

a manager application, the manager application receives the generated supply chain plan, automatically initiates at least one service according to the generated supply chain plan, and automatically performs an action, in response to initiating the at least one service, to resolve at least a portion of the excess or under capacity at the first enterprise through interaction with one or more other entities in the supply chain, the services being selected from among a plurality of available services based on a monetary value to the first entity of a resolution expected to be available using the selected service relative to other services, the action being selected from the group consisting of:

sell items to one or more other entities according to a previously existing contract between the first enterprise and the one or more other entity;

purchase items from one or more other entities according to the previously existing contract between the first enterprise and the one or more other entity;
